

NEW RELEASE AUTUMN 2012

fLORIANA®

Perfect for Pots

PANSY Plentifall™ Trailing Yellow

Viola x wittrockiana

Robust trailing pansy with full flower coverage

Spreads up to 60cm across

Bright buttery yellow flowers with soft whisker markings

The Pansy Plentifall™ Trailing series is an exciting development in plant breeding. This season Floriana is proud to release fresh, new buttery **Yellow** to its existing collection of **Azure Frost**, **Lavender**, **White** and **Mix**.

Plentifall™ Trailing Pansies have a similar culture to multiflora pansies with an exceptional branching habit and a **spread up to 60cm across**.

The mid-sized flowers of Plentifall™ pansies offer gardeners even more value by recovering quickly after rain and watering ensuring full and generous flower coverage for months at time.

These F1 hybrid pansies have an amazing cascading habit making them simply perfect for display hanging baskets, window boxes, urns and containers. Vigorous, easy-to-grow Plentifall™ pansies also make an ideal ground cover and may be planted to soften the edges of paved areas and retaining walls.

NEW RELEASE AUTUMN 2012

fLORIANA®

Perfect for Pots

PANSY Plentifall™ Yellow

FAST FACTS

Flowers: Medium sized. Clear, bright yellow with faint whisker markings

Position: Full sun

Height: 15-20cm approx.

Width: 60cm approx.

Flowering: 6-8 weeks after planting

Growing

Tip: Cooler weather produces larger blooms, deeper colours and more prominent petal markings. Deadheading encourages ongoing flowering.

Also look for these existing Plentifall pansies:

Azure Frost: Soft blue and white flowers with whiskers

Lavender: Lavender lower petals highlighted by a purple cap

Mix: Combines yellow, white, lavender and purple blooms

White: White flowers featuring light whisker markings
